

# Engineering our future

## Our purpose:

To promote the general advancement of science, engineering and technology and to facilitate the exchange of information and ideas on these subjects amongst the members of the IET and otherwise.

## We work with, and for the benefit of:

Industry

Practitioner

Academia

Society

## To achieve core outcomes:

### Engineering Excellence:

We will drive professionalism, standards and ethics.

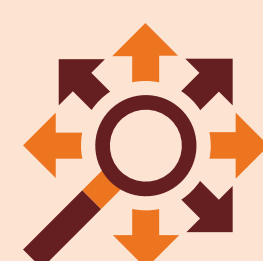

### Skills, Learning and Networks:

We will be a facilitator for the engineering community to network, learn and share knowledge and wisdom, connecting and developing people and organisations for success.

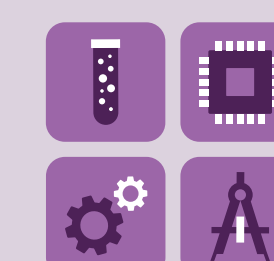

### Thought Leadership and Policy:

We will be the natural first call for policymakers seeking credible, independent advice relating to engineering and technology, trusted to provide the right information at the right time to the right people.

### Research Solutions:

We will be a leader in intelligence and analytics to the global engineering and technology research communities and a Learned Society of world renown.

### Education:

We will provide inclusive and inspiring education pathways to meet demand for engineering and technology skills.

## With a focus on:

Sustainability and Climate Change

Digital Futures
